BioGro (2510) Certified organic pigs, lambs, cattle and hens

We are based in Hororata and have been farming here for 28 years. Our philosophy in farming organically stemmed from our fathers and his fathers farming practices which began in Oxford over 90 years ago. By continuing to farm organically we believe in taking a holistic approach that is friendlier on the environment and soil, producing food the way it should be. Our BioGro certification is your assurance that our animals are antibiotic free, chemical free, 100% free range, cage/crate free. Our cattle and sheep graze on tall mixed pastures, our pigs roam free beneath Canterbury skies, and our hens flap wherever they please.

Elmwood - from our farm to your table.
